

## Anta Quality Fixed Income 0-8

## Long-Term Fixed Income Fund

Anta Quality Fixed Income 0-8 offers exposure to a broadly diversified fixed income portfolio, employing a flexible investment approach that allows the management team to seize the best opportunities in any market environment. The fund is actively managed through rigorous analysis of the macroeconomic landscape and fundamental analysis of issuances, investing in both government and corporate debt assets, with at least 70% in high credit quality, up to 25% in medium credit quality, and up to 5% in low credit quality. The average portfolio duration shall not exceed 8 years.

## ¿Why this fund?

**Experience and Knowledge:** a multidisciplinary and experienced investment team with extensive knowledge of financial markets.

**Diversification:** portfolio consisting of an average of 80-120 bonds from different types, sectors, and countries, mainly from the Eurozone, as well as other OCDE countries.

**Quality:** invests 70% in high credit quality assets, up to 25% in medium credit quality, and up to 5% in low credit quality. Average portfolio rating is A+ according to S&P.

**Flexibility:** the management team will take long risk positions and may use derivatives if necessary, within the limits of MIFID, in interest rates, sovereign debt, and corporate credit to generate alpha in all market scenarios.

**Risk Management:** rigorous analysis of opportunities under comprehensive control of market risk, credit risk, liquidity, investment in emerging countries, and others<sup>1</sup>.

**Sustainable Policy:** sustainability analysis is integrated into each phase of the investment process. The fund promotes environmental and social characteristics (Article 8).

## Investment process

**Macroeconomic Analysis:** study of the macro environment, geopolitical events, and key economic indicators from a global perspective, analyzing how they may impact the investment universe.

**Quantitative Analysis:** focused on company valuation through a proprietary quantitative model based on technology, artificial intelligence, and algorithmization. This identifies the most attractive assets in a universe of over 15.000 securities.

**Qualitative Analysis:** integration of a series of qualitative filters such as business type analysis, leverage levels, and stability of profits and cash flows. This, along with quantitative analysis, allows for the reduction of the universe to the top 1.500 highest-quality assets.

**Technical Analysis:** application of relative value techniques, technical analysis, and statistical methods to select high-quality assets undervalued by the market.

**Portfolio Construction:** selection of the top 80-120 highest-quality bonds, diversified by country, sector, and name, managing the portfolio dynamically.
